FIELD TRIP TO HORTICULTURE UNIVERSITY

We government degree college students as part of field tour took final BZC students for a field trip to Horticulture university garugubilli on 22/07/2023. It is located very near to parvathipuram. the students gained a lot of knowledge regarding tissue culture and biotechnology. Later students visited all the labs and work going on there. The resource person explained all the research going on there with great enthusiasm. Later we visited the field where green house is there under which several crops are growing under controlled conditions. Students get excited by knowing the various factors required for a proper growth of plants. Finally we ended up our field trip with great quest of gaining knowledge on biotechnology.
